

System solutions for your projects

System solutions for your projects

The optimized all-in-one system solution

WOLF complete solutions for you

Everything from a single source

**From restaurants through to DIY stores and residential complexes -
WOLF has the right solution to suit any application!**

WOLF GmbH is a leading global supplier of heating and air handling systems. Our sustainable products provide an optimum indoor environment in a wide range of settings - from restaurants and retail through to educational institutions and the logistics, residential construction and industrial sectors. Our practical solutions inspire designers, installers and private clients and showcase WOLF's commitment to the pressing topics of "sustainable heating technology" and "clean air". The company accentuates this aim with a clear promise: "WOLF – Perfectly in tune with you".

/01

Retailers and wholesalers
